DECLARATION UNDER 37 C.F.R. 1.131

We, Naveen N. Anand, Brian H. Barber, George A. Cates, Judith E. Caterini and Michel H. Klein, respectively of 88 Carnival Court, North York, Ontario, Canada, M2R 3T8; 1428 Broadmoor Avenue, Mississauga, Ontario, Canada, L5G 3T5; 37 Pemberton Road, Richmond Hill, Ontario, Canada, L4C 3T5; 91 Chatfield Drive, Ajax, Ontario, Canada, L1P 2J4; and 54 Strathgowen Avenue, Toronto, Ontario, Canada, M4N 1B9, declare as follows:

1. We are the joint inventors named in this application. The experiments referred to herein were performed in Canada.
2. Prior to April 1995, we had constructed the expression plasmid pCMVdhfr.chLCHC, a single expression vector containing the genes for both light and heavy chains as distinct transcription units each under its own promoter, constructed according to the procedure of Example 5.
3. Prior to April 1995, we had used the expression plasmid pCMVdhfr.chLCHC to produce, isolate and purify ch 44H104-CLTB36 conjugate, by Protein A purification and hplc fractionation, according to the procedure of Examples 5 and 6.
4. Prior to April 1995, we had characterized ch 44H104-CLTB36 conjugate as a covalently-linked dimer of heterodimers of heavy and light chains, according to the procedure of Example 8.

5. Prior to April 1995, we had utilized ch 44H104-CLTB conjugate in the immunization of macaques, according to the procedure of Example 9.

6. In support of these declarations, we append hereto appropriate pages of laboratory notebooks containing the various experiments described above and in the specification.

7. With respect to the laboratory notebook pages:

- The pages from notebook 1029 are signed by J. Remani, a technician working under the direction of the inventor Naveen N. Anand, who also signed these pages.

- The pages from notebook 1111 are signed by Judith E. Caterini, an inventor, with the exception of the page headed "Test Requisition Form", which is from J. Broderick, a technician working under the direction of Judith E. Caterini, to L. Gisonni, who performed the immunology experiments.

- In the papers from notebook 1111 is included page 53 dated May 15, 1995. However, as is clear from the page, the data presented is dated November 15, 1994. Page 54, also dated May 15, 1995, refers to certain conclusions and contains no new data.

- The pages from notebook 1157 are signed by Jason Broderick, a technician working under the direction of the inventor Judith E. Caterini, who also has signed many of these papers.

Included in these pages from notebook 1157 are pages 195 and 196, the first dated June 20, 1995 and the second dated June 17, 1995. The first page refers to work done June 14, 1995 and the second page to work done June 15, 1995. These pages refer to a "Boost #2 preparation" and a "Peptide Boost for group #3". These pages report work performed after April 1995 but are not concerned with data reported in this patent application.

We hereby declare that the laboratory notebook pages describe experimentation which was included in the Examples of the patent application, as identified above, performed prior to April 1995.

8. We further declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that wilful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such wilful false statements may jeopardize the validity of this application or any patent issuing thereon.

Declared at Douville, Quebec
this 6 day of March, 2002.
